Best Practices

With the aim to start MOOC Program

Spoken Tutorial Project, project of NMEICT, MHRD, Govt. of India, curated by IIT Bombay”.

Objectives: To enhance the future prospects of students and make them better employable.

The Context: Spoken Tutorial is a multi-award-winning educational content portal.

The practice: This is one of the best MOOC programmes of the country which teaches and make students skilled on latest free software so that anyone could use and expertise it.

Problems encountered and resources required: A multimedia lab equipped with required software for the practice and hands-on training.

Best Practice-1

Conducting Students mentoring and counselling program with their parents/guardians during normal period and lockdown period.

Objectives: To increase attendance in the online/offline classes and to minimize dropouts through personal counselling and to aware their parents regarding online class routine and academic activities as well of the college.

The Context: Students undergo various problems of stress. Statistics reveal increasing number of suicides and dropouts. Considering the student-teacher ratio in classrooms, it is impossible at times to give personal attention to students in class. One solution therefore is a ‘Mentor’ who can form the bond with students in true sense. Besides providing special attention to their studies, mentoring is vital for students to achieve emotional stability and to promote clarity in thinking and decision making for their holistic development.
